

**LET'S TALK ABOUT THESE GREAT, STANDARD
FEATURES OF THE EPSON® SURECOLOR® F2000 SERIES
DIRECT-TO-GARMENT PRINTER.**

Automatic Platen Height Detection: With this feature, you'll enjoy faster print times plus, more reliable, day-to-day productivity. Auto detection works with all available Epson® platens for the F2000 Series as well as "3rd party" platens.

A LED beam detection system automatically scans the flat surface of a garment (*up to 0.98" thickness*) prior to each imaging pass. The narrowest printing gap and highest imaging quality are achieved while protecting the print head from garment strikes.

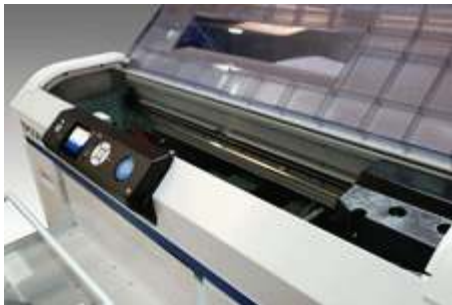

Quick Change, Interchangeable Platens That "Pop Off": Switch out platen sizes in just seconds. Adjustable platen heights accommodate varying garment thicknesses with ease.

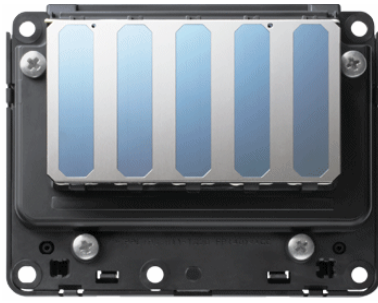

The Epson® Medium Garment Platen.....14"x16": This is the standard platen size included with each printer. Other, optional platen sizes can also be purchased.

LCD Front Control Panel: A full color, front, LCD control panel for displaying image previews, important job details and ink cartridge levels.

Top Access Cover: Allows for easy access for printer maintenance and for viewing garments being printed. The cover is open in this photo.

Epson® PrecisionCore™ TFP® Print Head

Technology: Commercial-grade print head technology designed specifically for direct-to-garment imaging. With its advanced thin film piezo (TFP®) print chip core (1/1,000 mm thin), the print head admirably executes precision ink droplet

control, shape and placement. The result is outstanding clarity and sharpness for garment imaging.

Each line on the print head is 1 inch in width. And, each line has 360 nozzles per line. *The F2000 White Edition printer has 360 nozzles per color and 1,1440 for white ink. The F2000 Standard Edition printer has 720 nozzles per color.* Segmented color channels allow cleaning by color pairs so that ink waste and cleaning cycle time are reduced.

Epson® UltraChrome® DG Ink Cartridges:

A full installation set of 250 ML ink cartridges is included with the printer at time of purchase.

WHITE EDITION HAS WH, WH, Y, M, C, K.

STANDARD EDITION HAS K, Y, M, M, C, C.

Each cartridge has built-in smart filtering technology to better ensure that ink entering the printer system is contaminant-free. An individual cartridge may supply ink to more than one

ink channel. When the "Replace Cartridge" message displays on the printer's front, color, LCD control panel, a variable amount of ink still remains in the cartridge. Ink cartridge shelf life is 2 years.

LOOK! EVEN MORE STANDARD FEATURES!

- ◆ **Robust Ink Filtering Technology:** An internal ink filtering system rids the inks of contaminants a second time before they enter the print head. This improves print head reliability and extends print head life.
- ◆ **Safety Stop Laser Light.**
- ◆ **Ethernet & USB:** Compatible with Macintosh® and Windows®.
- ◆ **Macintosh® and PC Compatible.**
- ◆ **USB Memory Port:** Handy for PC-free printing workflows.
- ◆ **1 Year Free Parts & Labor Warranty by Epson®** *(with an optional 2nd and 3rd year available).*
- ◆ **Epson® Software:**
 - >>> ***Garment Creator Application***
 - >>> ***Professional Communication Driver For Windows***
 - >>> ***LFP Remote Panel***
 - >>> ***EpsonNet Configuration Utilities***
